

Why aren't you building Beaded Face-Frames?

Beaded Face-Frames are a great way to add detail and richness to your cabinetry work. It's a mark of excellence which says, this cabinet was built by a craftsman with an eye for quality and attention to detail. The problem is, creating a traditional beaded face-frame on a tablesaw can be an incredibly time consuming and labor intensive process.

Before

After

“The reason that many woodworkers, including myself, have shied away from using beaded face-frames in the past, is simply because they take a lot of time to build. This system from Kreg changes all of that. Now we can knock them out in just a few minutes.”

-Bill Link, TCO Media

“Beaded face-frames can add up to 25% of value to my cabinet jobs. With this new system, I can build them far faster than before.”

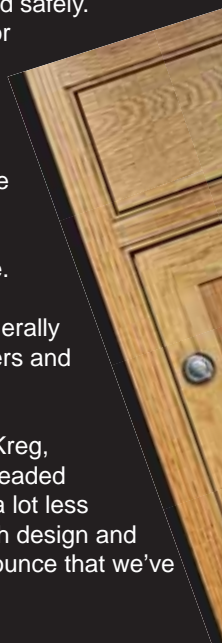

-Gary Striegler,
Striegler and Associates

You start by routing your bead's profile on the router table then move over to the tablesaw to cut it free. Because of the small size of the piece, you'll probably need a specialized sled to help you cut your opposing miters accurately and safely. Once cut, you'll need to make minor adjustments to the miters as necessary and join the beads to your frame using brad nails.

For many years, the only alternative to using a tablesaw to make your beading was to purchase a large, expensive, single purpose machine. Because of the expense and size constraints, this technique was generally limited to professional cabinetmakers and cabinet shops with large budgets.

Today, we're changing all that. At Kreg, we knew we could help you build beaded face-frames faster, easier, and for a lot less money than ever before. After much design and development... we're proud to announce that we've done just that.

The Kreg Way!

Our all new Precision Beaded Face-Frame System takes a radical new approach to building beaded face-frames, by leveraging the speed and flexibility of your router table to create incredibly precise 'notched frames'. This innovative notching technique is made possible through a patent-pending system featuring specialized router bits and a smooth sliding aluminum fence which can be attached to almost any router table. Whether you've been building beaded face-frames for years, or you've just been looking for an excuse to start, the Precision Beaded Face-Frame System will help you do it in less time and with less frustration.

See it in Action!
www.kregtool.com/beaded

How It Works:

Use the control arm and smooth sliding base to plunge the stiles into the specialized notching bit.

Use the Precision Router Stop to ensure perfectly placed notches on the rails.

Switch to your standard routing fence and specialized beading bit to apply a decorative bead.

Use Kreg Joinery™ to secure the notched stiles and rails together. Glue is optional.

How It Looks!

Precision Beaded Face-Frame System

Sliding Base

Smooth Sliding Base features 20 stainless steel ball bearings for durability and longevity.

Control Arm

Extended control arm provides smooth operation, and improved control.

Integrated Clamp

Heavy duty clamp holds workpieces firmly in place. Features quick release handle and adjustability for variable stock thicknesses.

Heavy-Duty Fence

Industrial grade heavy-duty fence made from Aircraft Grade Aluminum. 28" long.

Router Table Stop

Specialized stop lets you repeat cuts at the same precise measurement again and again. Can be flipped out of the way when not in use.

System includes:

- Heavy Duty Aluminum Fence
- Zero Clearance Ball Bearing Sliding Base
- Precision Router Table Stop
- 1/4" x 1-1/2" Notching Bit
- 1/4" Standard Beading Bit
- 1/2" Precision Router Table Set-Up Bar
- Integrated Clamp
- Integrated Tape Measure
- 1/2" Dowel Pin

Step-by-Step DVD Included

*Connects to any standard router table, with the addition of a t-slot 6" to 6-1/2" from the center of the insert plate.

Precision Router Table

Our Precision Router Table includes a built-in Combination Miter/T-Slot designed specifically for easy attachment of the Precision Beaded Face-Frame System. It also comes with a wide variety of features designed to make every routing task you tackle faster and easier, including a table saw inspired self-squaring fence, built-in jointer, magnified Precision Lens Cursor, steel reinforced Easy-Slide™ Micro-Dot MDF top, and unique bottom-up insert plate levelers.

- Fully-enclosed Aluminum Fence
- Self-Squaring T-Square Style Fence
- Doubles as a Vertical Jointer
- Precision Lens Cursor
- Professionally Edgebanded MDF Top
- Easy-Slide™ Micro-Dot Skin
- Phenolic Insert Plate
- Unique Bottom-Up Levelers
- Dual Reducing Rings
- Porter-Cable Guide Bushing Compatible

Accessories

Precision Router Bits

These specialized bits were specifically designed for use with the Kreg Precision Beaded Face-Frame System. Each bit features a high quality 1/2" shank construction along with high-grade carbide tips for extreme durability. We currently offer 6 beautifully unique beading bits to match your distinctive project and 4 standard notching bits depending on your rail widths and bead of choice.

Prices Range from \$34⁹⁹ - \$59⁹⁹

Precision Set-up Bars

These innovative setup bars feature three unique ways to ensure your projects get the precision they truly deserve. Whether you're setting your blade depth, positioning your fence, or double-checking your cuts, these precise aluminum bars do it all!

ITEM# PRS3400

\$39⁹⁹

Precision Router Table Lift

This heavy-duty lift includes several unique features which work together to bring true speed and convenience to your router table top. Features like the Quick-Lift and tool-less micro adjustment wheel allow you to make fast bit changes and precise depth adjustments on-the-fly. If you're ready to start working quickly and conveniently, look no further.

ITEM# PRS3000

\$329⁹⁹

Precision Router Table Stop

Bring more precision and repeatability to your Precision Router Table with this uniquely designed stop. Features a low-profile aluminum design uniquely made to flip out of the way when not in use. Also includes our exclusive Precision Lens Cursor giving you a clear, accurate, and precise view of the fence's tape.

ITEM# PRS7850

\$24⁹⁹

Multi-Purpose Router Table Switch

Add safety and convenience to your Precision Router Table with this incredibly handy power switch. Features a 2-Plug design which allows it to control two independent devices at once, Key-Lok™ which eliminates accidental power-on, and a long 8ft. heavy-duty 14 gauge power cord.

ITEM# PRS3100

\$34⁹⁹

Heavy-Duty Casters

Add true mobility to your Universal Steel Stand with our Heavy-Duty Casters. Built to last and perform, these casters feature a dual-locking mechanism that won't roll OR pivot once engaged, resulting in an extremely stable work station. Includes all necessary hardware.
